

**STATE OF NEW MEXICO'S RULE 71.3 REPORT – FY 2022**  
**EXHIBIT A: LOWER RIO GRANDE ADJUDICATION BUREAU**

August 6, 2021

Pursuant to the requirements of NMRA Rule 1-071.3, the State of New Mexico presents its report setting out the State's priorities and available resources for the state stream system adjudication, in the Lower Rio Grande Adjudication Bureau for fiscal year 2022 (July 1, 2021 to June 30, 2022), which will be filed in each adjudication. The available resources are based upon full time employee ("FTE") time, including staff and contractors, and are listed in Table 1.

**SUMMARY OF AVAILABLE RESOURCES FOR THE LOWER RIO GRANDE ADJUDICATION BUREAU**

	FY2020 FTEs	FY2021 FTEs	FY2022 FTEs
<b>Total Bureau Staff and Contractor Resources</b>	<b>13.35</b>	<b>12.86</b>	<b>11.65</b>
A. Lower Rio Grande Adjudication	12.55	12.47	11.05
B. Animas Underground Water Basin Adjudication	0.80	0.39	.60

**LOWER RIO GRANDE ADJUDICATION PRIORITIES FOR FY 2022**

A. General

1. Litigation of proposed or designated stream system/expedited *inter se* issues

- a. Steam System Issue 104 (United States' interest in the Rio Grande Project). This stream system issue is currently stayed for continuing settlement discussions related to this and other litigation, looking for a comprehensive negotiated solution to issues raised by this steam system issue, by the lawsuit over the Rio Grande operating agreement, and by Texas v. New Mexico.
- b. Stream System Issue 107 (status of pre-Rio Grande Project surface water rights). This stream system issue is currently stayed along with, and for the same reason as, Stream System Issue 104. There is one appeal from this stream system issue, arising out of the Court's striking of the purported Notice of Participation by dismissed claimant Scott Boyd. That order was affirmed by the Court of Appeals on June 24, 2021.
- c. The dismissal of the Pre-1906 Claimants' expedited *inter se* is also on appeal. This case is on the Court of Appeal's General Calendar. Briefing has not begun.
- d. Toby Romero subfile. The New Mexico Supreme Court granted Toby Romero's petition for writ of certiorari to review the Court of Appeals' affirmance of the adjudication court's adoption of the special master's finding that the railroad water

right was partially forfeited. The case is fully briefed and awaiting decision from the Court.

- e. Copper Flat Mine expedited *inter se*. Oral argument was held on April 1, 2021, in the Court of Appeals in this appeal of Mendenhall, forfeiture and abandonment issues arising out of water rights related to the Copper Flat mine. The case is awaiting decision from the Court.
- f. Rice/Packard subfiles. The parties reached agreement on the disputed issue of the amount of irrigated acreage associated with these two neighboring subfiles. The State submitted the signed offers of judgment for these two subfiles to the Court.
- g. Apodaca Cervantes. This subfile concerns a challenge to the State's denial of a claim to a greater FDR than 4.5 acre-feet per acre per year. Mediation failed to resolve it, and a scheduling conference was requested by the State on March 4, 2020. A scheduling conference is expected to be set shortly.

2. Other non-LRG litigation.

Texas v. New Mexico. The LRG Adjudication Bureau legal, support, and technical staff have been and will continue to be involved in support for discovery and trial preparation. Trial is scheduled to begin September 3, 2021, in Cedar Rapids, Iowa.

3. Negotiation with major parties.

None now pending other than the negotiations related to the Stream System Issue 104 and Stream System Issue 107 stay.

4. Mediation of other substantive issues.

None of substantive consequence.

5. Other special procedures and procedural motions in the LRG

- a. Continuing authentication of claims to historical groundwater use for claimants seeking to add groundwater component to their adjudicated and unadjudicated surface water rights, in conjunction with permitting applications to the District IV office.
- b. Implementation of Stream System Issue 108, retroactive determination of EBID surface water amounts and places of use for subfiles entered before the settlement of Stream System Issue 101.
- c. The State still intends to file a motion to expand the scope of Implied Consent to include instances where all objections are met and where documented verbal consent is not followed by a written stipulation.
- d. A motion to exclude certain smaller surface water livestock impoundments from the adjudication was filed on October 4, 2019.

B. Lower Rio Grande Adjudication, Routine Subfile Processing

1. Routine subfile processing encompasses most of the bureau's everyday work, including updating the Hydrographic Survey, creating new maps to conform to multiple point and polygon requirements, analyzing claims for a larger Farm Deliver Requirement, legal review of proposed offers, service of offers, revised offers or duplicates, reviewing objections, discussions with objecting claimants by survey or legal staff, default and implied consent requests, correcting entered orders with typographical errors and re-opening entered orders needing significant correction.
2. The preparatory work for the creation of new subfile offers is focused in the Northern and Southern Mesilla sections, though work actively continues in all sections. The continuing receipt of Hydrographic Survey Change Requests (HSCR) for all sub-basins prevents the hydrographic survey staff from working in one sub-basin exclusively.
3. We served the offer for the last unadjudicated subfile in Nutt Hockett. The parties and Court approved the offer, and Nutt Hockett is now 100% completed.
4. The status of all sections as of July 19, 2021, is:
  - a. Nutt Hockett: 43 subfiles, 100% served, 100% adjudicated
  - b. Rincon: 1238 subfiles, 97% served, 85% adjudicated
  - c. Northern Mesilla: 5912 subfiles, 61% served, 41% adjudicated
  - d. Southern Mesilla: 5504 subfiles, 62% served, 47% adjudicated
  - e. Outlying Areas: 1360 subfiles, 83% served, 74% adjudicated
5. The LRG adjudication bureau recently transitioned to a new server. Survey staff use the servers to make edits to the hydrographic survey and to generate maps for the offers. The prior server was obsolete and without technical support. Frequent problems highlighted the risk of losing data in the event of a crash. The new server is more reliable and has tech support. Maps are now in color and are more legible. We transitioned to the new server on July 12, 2021, but development and tweaks to the system will continue.
6. Las Cruces Office lease expired July 31, 2021 and is now holding over on a month by month basis. We started the process of looking for office space in April. We advertised for requests for proposals, but we did not receive many applicants. We will be re-advertising. The owner did not put in a bid the first time, so it is likely that the office will be moving. James Hangen is part of the office group overseeing the lease issues with the office.

7. The Office continued to do field visits, although not at pre-shutdown level. Staff worked with claimants primarily over the phone or computer.

### **ANIMAS UNDERGROUND WATER BASIN ADJUDICATION PRIORITIES FOR FY 2022**

1. J & C Victor Trust appealed a decision by Judge Robinson to not reconsider the basin-wide FDR set in a 2012. The appeal has been fully briefed and awaiting a decision from the Court of Appeals.
2. As of July 19, 2021, there are 186 Animas subfiles, of which 88% have been served, and 70% have been adjudicated.
3. Besides service of subfiles, the current focus of the adjudication includes resolving subfiles in which the claimant has rejected the proposed judgment offered by the State.
